# Módulos migrados

- Flood Control
  - Implementa uma tela administrativa para opções ocultas para controle de Flood (como limite para tentativas de login) no Drupal.
- Filter Protocols
  - É um módulo que expõe uma interface de configuração dos protocolos que serão permitidos na função `filter_xss_bad_protocol()`.

# Filter Protocols

The screenshot shows the Drupal administration interface. At the top, there is a navigation bar with a 'Back to site' link, a 'Manage' menu, 'Shortcuts', and the user 'admin'. Below this is a secondary navigation bar with tabs for 'Content', 'Structure', 'Appearance', 'Extend', 'Configuration', 'People', 'Reports', and 'Help'. The main content area is titled 'Filter allowed protocols' with a star icon. There are two tabs: 'List' and 'Filter allowed protocols', with the latter being active. A breadcrumb trail reads 'Home » Administration » Configuration » Content authoring » Text formats and editors'. The main configuration area has a label 'Allowed Protocols' above a text input field containing the text 'ftp http https irc mailto news nntp rtsp sftp ssh telnet'. Below the input field is a blue 'Save configuration' button.

# Desafios na migração

- Criação dos menus e links que foram substituídos pelo “routing”
- Mudanças no modo de construir formulários
- Nova API para salvar configurações do sistema
- Pouca documentação / Módulos de exemplo
- Git :-)

# Considerações

- Gostamos do modelo do evento (novidade para o grupo)
  - Metodologias
  - Aprendizado
  - Amizades
  - Hospitalidade
  - Comida :D
